

# DESCRIPTION

## LASTING SHAPE™ SMOOTH

### 1) Diagnosis.

Check the quality of the hair to make sure it is in good condition before carrying out the Revlon Professional LASTING SHAPE™ SMOOTH . Review service records (color, perms, bleaching, etc.) in order to choose the most appropriate LASTING SHAPE™ SMOOTH cream depending on the client's hair type. In case of doubt, choose the mildest cream.

### 2) Select the look that best suits your client.

### 3) Wash the hair.

- Shampoo with a neutral shampoo, towel dry hair and comb carefully.
- Do not massage the scalp.

### 4) Application of LASTING SHAPE™ SMOOTH Hair Smoothing Cream.

- Divide the hair into four sections.
- Place the smoothing cream into a non-metallic bowl.
- Beginning at the nape of the neck, use a color brush to apply the Smoothing Cream rapidly section by section along the lengths of the hair without soaking it. Avoid the scalp, leaving a margin of 1-2 cm.
- Ensure the cream is distributed evenly throughout the hair.
- If necessary, massage the hair well with your hands while keeping it straight.
- If the hair has been straightened previously, apply only to the regrowth area.
- The application time must be counted as part of the total development time.

### 5) Rinsing.

- Rinse the hair thoroughly with lukewarm water for 5 minutes to ensure the product is completely removed.
- It is important the hair remains straight and flat during the process. Towel dry.

### 6) Drying and Ironing.

- For volume reduction services, proceed directly to step 7 without drying or ironing the hair.
- For the Lasting Smooth look or a Japanese Bob-Straight, dry the hair with the fingers and use an iron. The iron must be set at 180°C and glide along each strand in a slow and continuous motion.

### 7) Application of Lasting Shape™ Smooth Neutralizing Cream Depending on the desired result apply Neutralizing Cream on towel dried hair or on flat-ironed hair.

- Divide the hair into 4 equal sections.
- Apply the neutralizing cream.
- Begin applying the neutralizing cream on the nape area.
- Comb the hair while applying.
- Ensure the neutralizing cream is well distributed throughout the hair.
- Keep the hair straight at all times.
- Leave to process for 10 minutes.

### 8) Rinsing.

Rinse the hair thoroughly with lukewarm water for 5 minutes to ensure the product is completely removed. Towel dry.

### 9) Finish.

- Apply STYLE MASTERS™, IRON GUARD™ or LISSAVER™ or MAGNET™ Ultimate Reparative Melting Balm before drying and straightening with a flat iron to give the hair the desired texture.
- Do not pull, tangle or knead the hair.
- Use the hair dryer and the flat irons to style the hair as desired.
